

The Most Reliable Truck on the Market

When material has to be moved, you want to move it quickly, safely, reliably, and consistently. That's the premise behind every **SCHAEFF** electric sit-down forklift engineered and built. Designed not only to satisfy the tough requirements of American National Standards Institute (ANSI), and Occupational Safety and Health Administration (OSHA), but to satisfy even tougher requirements from you, the user.

SCHAEFF engineered forklifts give you a combination of power, performance, and reliability unequalled in the materials handling industry. We combine technology and engineering with a total commitment to providing products that meet your specific application needs, and back those products with a dealer network that spans all of North America.

Comprehensive 1-Year Investment Protection

Every **SCHAEFF** electric sit-down counterbalance forklift built is backed by a full one-year/2,000-hour warranty covering everything except wearables.

Equipped with the most current Transistor Drive Motor Control, Solid State Switches, and a Microprocessor that has programming functionality allowing the user to set limits, and for diagnostics to give you even greater protection from component failure and maximize productive uptime operation.

Optional two, three, four, and five year coverage is available, offering further protection for your investment. At **SCHAEFF**, emphasis is on designing reliability in up front to maximize mean time between failure (MTBF). System monitoring and diagnostics effectively minimize mean time to repair (MTTR).

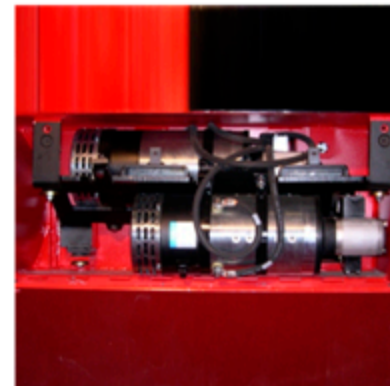

Take the SCHAEFF Challenge

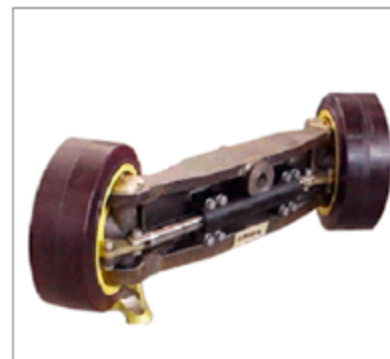

SCHAEFF'S spacious human engineered operators compartment is designed to fit a wide range of operators for increased productivity, comfort and safety. You can count on the fact that when it comes to quality, innovation, and service **SCHAEFF** is pioneering the standard.

SE Series trucks are equipped with GE solid state SEM 740A separately excited microprocessor-based SCR drive motor control with on-board diagnostics.

Two lift pumps are standard for superior lift and lower speeds

Heavy-duty steer axle features heavy alloy steel plate sections around a single, double-acting cylinder
